** These Instructors have Club Sponsored AMA Intro-Pilot Insurance **

This permits them to provide instruction to a non-AMA member for up to 60 days.

Students should apply for AMA (Academy of Model Aeronautics) Membership.

Instructors are generally available on Tuesdays, day and/or evening (weather permitting).

If you would like to make an appointment with an instructor, you may call anyone on the list. For best results, call an instructor with the same radio type as you.

Instructors will perform the following services, free of charge, at the request of the student:

1. Inspect aircraft for proper structural integrity, operation and balance.
2. Help set-up airplane motor and controls as needed.
3. Provide safety rules and regulations of airfield and aircraft operation.
4. Provide ground school on the basics of flight.
5. Perform test flight of aircraft for trimming purposes, using the buddy-box system, with the student.
6. Train the student through their solo flight.
